(54) Title: METHOD FOR TEMPORAL INVERSION OF A WAVE

(54) Titre : PROCÉDÉ POUR INVERSER TEMPORELLEMENT UNE ONDE

(57) Abstract: According to the invention, a wave, corresponding to a signal $s(t)$ may be temporally inverted by application of a first transformation to lower the central frequency thereof to produce a first set of transformed signals $K_i(t)$ then a second set of transformed signals $K_i(t)$ is produced, representing the temporal inversion signal $s(-t)$ and a third transformation is applied to said second set to generate the temporally-inverted signal $s(-t)$

(57) Abrégé : Pour inverser temporellement une onde correspondant à un signal $s(t)$, on lui applique une première transformation pour abaisser sa fréquence centrale en produisant un premier ensemble de signaux transformés $K_i(t)$ puis on produit un deuxième ensemble de signaux transformés $K_i(t)$ représentatif du signal d'inversion temporel $s(-t)$ et on applique à ce deuxième ensemble une troisième transformation qui génère le signal d'inversion temporel $s(-t)$
